

Type of procedure	Laparoscopic procedures: total/subtotal hysterectomy ± SOE, cystectomy, myoma enucleation
Airway	Intubation
Anesthesia model	Sevoflurane / Remifentanil
Epi / Spinal	Spinal with morphine
Premedication	Paracetamol + COX inhibitor
Tips for the anesthesiologist	Risk of increased intra-abdominal pressure and CO ₂ retention. Ensure adequate analgesia and PONV prophylaxis.
Recommended vascular access	Peripheral IV ×2 (≥18G). Consider arterial line.
