

Type of procedure	Limb lengthening
Airway	Intubation
Anesthesia model	Sevoflurane / Fentanyl
Epi / Spinal	Epi (if indicated)
Premedication	Paracetamol + Oxycodone
Comment	-
Tips for the anesthesiologist	Consider airway management and stable positioning. Plan for postoperative analgesia.
Recommended vascular access	Peripheral IV x2 ($\geq 18G$) + arterial line. Central venous catheter if complex surgery or ASA ≥ 3 .
