

Type of procedure	Renal artery embolization
Airway	Intubation
Anesthesia model	Sevoflurane / Remifentanil
Epi / Spinal	–
Premedication	Paracetamol + Ondansetron + Betamethasone
Notes	Consider Epi (TEDA) – consult interventionalist/urologist regarding expected pain.
Recommended vascular access	Peripheral IV x2 (18–20G). Arterial line for major procedures or ASA ≥ 3 . Consider central venous access if instability risk.
